## Experience

**Full Stack Developer** **Ninjabet.it, Remote (EU/Italy)** **Mar 2024 - Present**

- Architect, design, develop, deploy, and maintain a scalable sports betting platform using a modern tech stack.
- Optimize front-end architectures to develop scalable and maintainable codebases and craft seamless user experiences using React.js, Astro.build, Zustand, TailwindCSS, etc.
- Integrate APIs by connecting front-end components with back-end services using RESTful and GraphQL APIs and Python (API/Rest/Django).
- Develop back-end services in Django on top of MySQL databases.
- Conduct code reviews and mentor junior developers to maintain high-quality code standards.
- Deploy and manage applications on the AWS cloud platform, ensuring scalability, performance, and security.
- Implement testing strategies to deliver high-quality, bug-free code.

**Product Engineer** **Akili Ventures Inc, Remote (US, Poland)** **Nov 2022 - Jan 2024**

- Spearheaded feature development for a fintech application, focusing on web interfaces with React.js and mobile applications using React Native/Expo.
- Engineered robust APIs in the backend using Node.js.
- Successfully implemented extensive offline support features, significantly improving app resilience and user experience.
- Conducted comprehensive bug identification and resolution, ensuring smooth application performance and user satisfaction.
- Developed an additional product by integrating Shopify APIs and Google Pub/Sub for enhanced functionality.
- Led the complete development of Android applications leveraging React Native, Tailwind CSS, and Firebase.
- Actively participated in candidate screening processes for recruitment.

**Frontend Engineering Consultant** **AEROMETREX, Remote (Australia)** **Dec 2021 - Oct 2022**

- Developed features for and maintained a web-based mapping and data visualization platform.
- Learned and contributed using Angular.io, despite initial lack of experience.
- Implemented a new, complex user interface for a mapping application.
- Collaborated with product managers, designers, and backend developers.
- Authored and updated technical documentation, and enhanced test coverage to over 75%.
- Mentored and trained junior front-end engineers, fostering team skill development.
- Assisted in triaging and resolving critical bugs, ensuring platform stability.
- Delivered key features and enhancements, boosting platform performance and usability.

**Software Engineer** **TrendPro Systems Ltd, Nairobi, Kenya** **Jan 2015 - Oct 2021**

- Founded trendpro.co.ke, a web and mobile apps development and design company in Nairobi, Kenya.
- Worked with clients to formulate specifications for features/products.
- Handled the design, front-end architecture, development, code review, and testing of web and Android applications.
- Developed and shipped web and mobile applications (React and React Native experiences/applications), from UI to services.
- Ensured that non-functional requirements such as security, code reuse, and performance (especially hunting down/preventing memory leaks from React/React-Native components & ensuring PWA lighthouse score is above 90%) are considered when developing web solutions.
- Collaborated with team members, stakeholders, and customers' development teams to help beat product launch deadlines.
- Managed projects from concept to production, including proposal, discussion, and execution.

**Frontend/Mobile Developer** **Lori Systems, Nairobi, Kenya** **Mar 2019 - Dec 2019**

- Spearheaded the front-end development of a key internal web application using React.js, ensuring efficient, user-friendly interfaces.
- Led the development of a client-facing Android application with React Native, focusing on responsive and intuitive design.
- Collaborated closely with the Product Management team to align development goals with business objectives and user needs.

**Software Engineering Volunteer** **EBAFOSA, Nairobi, Kenya** **Dec 2018 - Mar 2019**

- Volunteered to develop a climate action web application, EBAgroPamoja, linking actors in the agro-value chain to opportunities and clean-energy solutions for ebafo.org.
- Designed, architected, and wrote the front-end of their eCommerce application using React.js with hundreds of reusable components.

## Education

**B.Sc. in Computer Science** **JKUAT** **Nairobi, Kenya** **April 2011 - Dec 2014**

## Skills

---

**Programming Languages:**  JavaScript /  TypeScript,  HTML5,  CSS3,  Python(Intermediate)

**Frameworks and Tools:** React.js, React Native, Expo, Node.js, Django, GraphQL, RESTful APIs, Firebase, Astro.build, TailwindCSS, Zustand

**Cloud Platforms:** AWS (Lambda, LightSail, Cognito, S3, Route53, RDS, EC2), Google Cloud (Functions, Pub/Sub), Firebase

**Testing and Version Control:** Jest, React Testing Library, Git, Pytest(Intermediate)

**Databases:** MongoDB, Cloud Firestore, MySQL

**Languages:** English (Proficient)

## Certifications

---

- Divide and Conquer, Sorting and Searching, and Randomized Algorithms - [Coursera](#)
  - Graph Search, Shortest Paths, and Data Structures - [Coursera](#)
  - Greedy Algorithms, MSTs, and DP - [Coursera](#)
  - Graph Theory Algorithms - [Udemy](#)
-
